Conscious Sedation Nitrous Oxide

A permit is required for nitrous oxide, check with Dental Society and Local Township.

Dentist must have continued CE Courses in sedation as well as hygienist.

New Construction, Dr will need to hire a plumber who is nitrous qualified. They can check with local Nitrous Tank Suppliers.

Existing building, Contactor will have to plumb special piping into the walls and install dental quick disconnects. This is very expensive A Cart is suggested. Dm6900-9900pa
